FARES ZAGHDOUDI

Full-Stack Software Engineer

Germany | fz22211094@gmail.com | +49 152 24305406 | LinkedIn | GitHub

SUMMARY

Full-stack developer who enjoys owning a product end to end — from backend APIs to the dashboards people actually use. I build with JavaScript and TypeScript, and I'm currently exploring how AI agents can automate real workflows rather than just answer questions.

PROJECTS

Gastronome.tn — Full-Stack Platform

GitHub

A restaurant/food-service platform with an admin dashboard and an AI agent integrated into platform workflows.

- Designed and built the backend and REST API powering the platform.
- Built the administration dashboard and internal back-office.
- Integrated an AI agent to support and automate platform workflows.
- Owned technical and architectural decisions throughout the project.

Stack: TypeScript, Node.js, React, REST APIs, Git

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React

Backend: Node.js, REST APIs

AI & Automation: AI Agent Integration, Workflow Automation

Tools: Git, GitHub

EXPERIENCE

Freelance Full-Stack Developer — Gastronome.tn

June – July 2026 · Freelance

- Built and maintained backend services and REST APIs for the Gastronome.tn platform using TypeScript and Node.js.
- Designed and developed the administration dashboard and back-office portal.
- Integrated an AI agent to automate platform workflows.
- Managed the project independently across the full development lifecycle, from architecture to delivery.

Customer Service Representative — Amazon

2024 – 2025

- Handled customer inquiries and resolved issues related to orders, deliveries, and refunds.
- Communicated clearly and professionally across written and verbal channels.

Shift Manager — McDonald's

2020 – 2024

- Managed team workflows and service quality as part of the management team, in a fast-paced environment.
- Built a strong foundation in reliability, organization, and staying solution-oriented under pressure.
