FARES ZAGHDOUDI TS

Full-Stack Software Engineer

Full-stack developer who enjoys owning a product end to end — from backend APIs to the dashboards people actually use. I build with JavaScript and TypeScript, and I'm currently exploring how AI agents can automate real workflows rather than just answer questions.

EXPERIENCE

2022 – 2026

Freelance Full-Stack Developer — Gastronome.tn

June – July 2026 · FREELANCE

- Built and maintained backend services and REST APIs in TypeScript and Node.js, plus the admin dashboard and back-office portal.
- Integrated an AI agent to automate platform workflows; managed the project independently from architecture to delivery.

Customer Service Representative — Amazon

2024 – 2025

- Handled customer inquiries and resolved issues related to orders, deliveries and refunds.
- Communicated clearly and professionally across written and verbal channels.

Shift Manager — McDonald's

2022 – 2024

- Managed team workflows and service quality as part of the management team in a fast-paced environment.
- Built a strong foundation in reliability, organization and staying solution-oriented under pressure.
